Education

M.S. in Robotics and Autonomous Systems

Arizona State University, Tempe, Arizona, United States

Aug. 2024 – May 2026

GPA: 3.5/4.0

B.S. in Mechanical Engineering

National Taipei University of Technology, Taipei, Taiwan

Sep. 2019 – Jun. 2023

GPA: 3.03/4.0

Professional Experience

BELIV Lab, Arizona State University

Research Assistant

Jun. 2025 – Present

Mesa, Arizona

- Built a **BC+TD3** pedestrian policy in **CARLA** for safety-critical AV testing.
- Designed **BEV + kinematic observations** for continuous pedestrian control.
- Automated **BC training** on **ASU SOL HPC** with **Bash** job scripts.
- Increased collision rate from **0% to 45%** while reducing vehicle clearance.

Publications

- **Chih-Hao Tsai, H. Guo, and J. Zhao**, “Closed-Loop Pedestrian Policy Learning for Safety-Critical Scenario Generation in Autonomous Driving,” *Modeling, Estimation and Control Conference (MECC)*, 2026 (Accepted).

Academic Projects

OmniVLA Semantic Warehouse Navigation

Jan. 2026 – Apr. 2026

- Built a **semantic navigation pipeline** with **OmniVLA-edge, ROS 2, Gazebo, and Nav2**.
- Created a **semantic goal library** linking language aliases, goal images, and navigation poses.
- Developed a **ROS 2 data collection** and **JSONL export** pipeline for VLA fine-tuning.
- Fine-tuned **OmniVLA-edge**, reaching **97.57% validation accuracy** and about **80% evaluation accuracy**.

Consensus-Based Multi-Robot Warehouse Task Allocation

Aug. 2025 – Dec. 2025

- Built **Max-Consensus** task allocation with distance-based bidding and one-task-per-robot assignment.
- Implemented a **ROS 2 + Gazebo** warehouse simulation with **2D LiDAR** robots.
- Integrated allocation results with **Nav2** goal dispatch and task-status monitoring.
- Verified **finite-time convergence** and conflict-free assignments under capacity constraints.

Vision-Based Maze Solving & Path Planning with MyCobot Pro 600

Mar. 2025 – Apr. 2025

- Built a **ROS 2 robotic-arm pipeline** for 6-DOF maze solving from camera-captured paths.
- Created a **URDF digital twin** for motion testing in RViz and Gazebo using **SolidWorks**.
- Applied **OpenCV** and **A* planning** for maze preprocessing, skeletonization, and path extraction.
- Validated a **sim-to-real trajectory pipeline** on physical hardware via TCP/IP control.

Handwriting Company Logos Recognition

Oct. 2024 – Dec. 2024

- Built an **image recognition system** with CNNs, EfficientNet, ResNet, and Swin Transformer.
- Trained on a **160K+ image Logo-2K+ dataset** and improved accuracy through model tuning.
- Developed a **Tkinter GUI** for real-time hand-drawn logo similarity matching.
- Achieved **60% test accuracy** with fine-tuned EfficientNet-based recognition.

Image Segmentation with Vision Transformer

Oct. 2024 – Nov. 2024

- Fine-tuned a **Vision Transformer** for object-background image segmentation.
- Integrated **depth estimation** to separate foreground and background regions.
- Applied adaptive **Gaussian blur** post-processing for depth-aware visual effects.

Technical Skills

- **Programming:** Python, C/C++, MATLAB, Bash; PyTorch, TensorFlow, OpenCV
- **Robotics & Simulation:** ROS 2, Nav2, URDF/xacro, Gazebo, RViz, CARLA, Multi-robot Systems, 3D modeling
- **Control & Embedded:** PID/PI control, kinematics, odometry/IMU integration, sensor-based control, sim-to-real validation
- **Machine Learning:** Deep Learning, Reinforcement Learning, Behavior Cloning, VLA/VLM Models, Computer Vision
- **Tools:** Linux, Git, Simulink, SolidWorks, ASU SOL HPC
